

Program Management Office (PMO) pragmatic solution delivered

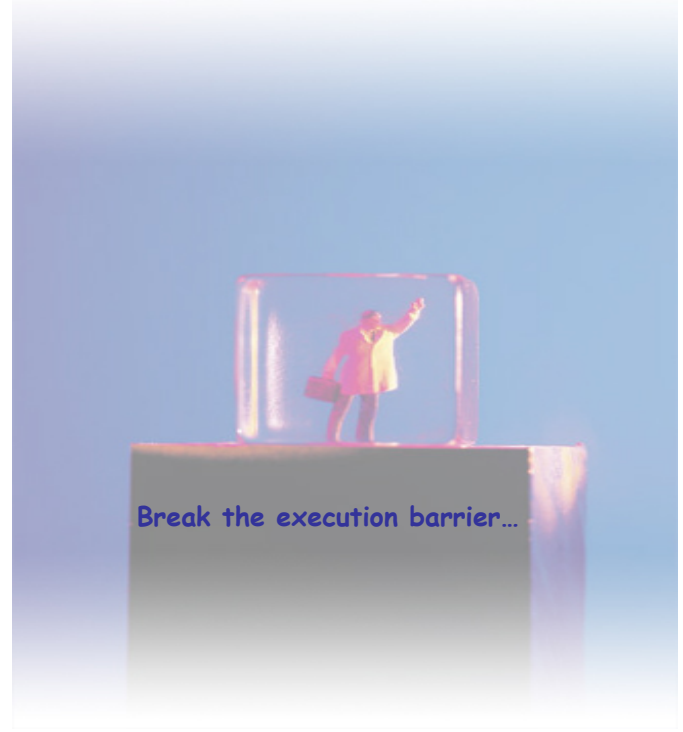

PMOiQ™ is a next generation performance intelligence suite for PMO. It enables end-to-end leadership of portfolio using intuitive scorecard, proactive risk mitigation, root-cause analysis, and performance management—necessary for effective PMO execution!

Program Leadership is an intersection of multiple organizational practices coming together. At the core are governance, project management, performance management, process management, quality management, organization adoption management, to name a few. The project manager's ability to sanction these processes, identify risks and execute successfully determine the overall projects' health and the corresponding program.

Introducing **PMOiQ™**, release 3.0, is an integrated PMO and performance management suite. It features a PMO scorecard for effective portfolio management which yields performance intelligence at the enterprise and operational levels. The user interfaces are tailored to project, program and portfolio managers while providing relevant content for successful execution. Key features and benefits:

effective execution

- ❖ Proactive risk mitigation in a-360 view of projects
- ❖ Activity-based Costing (ABC) performance tool

- ❖ Intelligent dashboard with smart and configurable Key Performance Indicators (KPIs)
- ❖ Quick drill-down to root cause analysis
- ❖ Flexible configuration for PLM and SDLC milestones and tracking across a matrix organization, supporting the following:
 - Process-based organization
 - Process by functional area
 - Process by region

performance scorecard

- ❖ Program and project collaboration engine
- ❖ MBO and smart goal management across organization and process hierarchies
- ❖ Goal and task management
- ❖ Continuous process improvement--management and tracking
- ❖ Learning engine

integrated with DynamicsIQ™ analytics

- ❖ Flexible views of program and project performance
- ❖ Link to customer value creation and the customer experience
- ❖ Trending, analysis, and alerts on demand

how it works?

The PM is able to view his/her project performance by the default scorecard without cumbersome reports and/or plethora of manual steps

The PM Execution module enables the PM to either enter his/her project data or capture it from another tool while identifying and collaborating on key risks

The Performance Scorecard module enables him/her to learn from past project challenges while establishing new improvement goals for current project

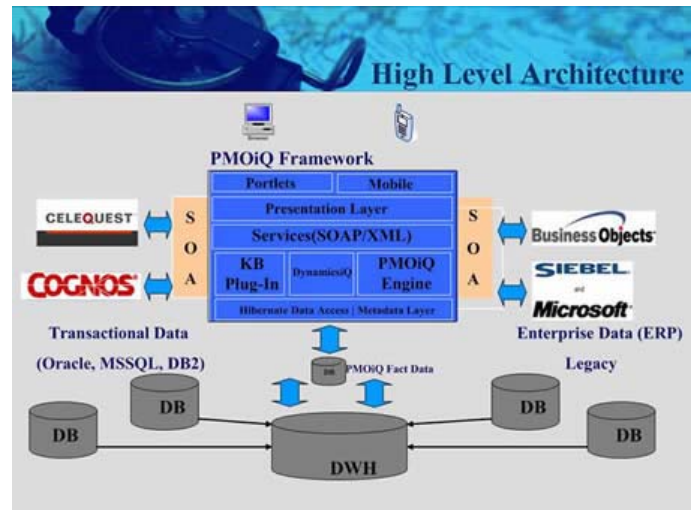

The program views are actionable. They render the overall program health with inter-project dependencies, program risks, and potential root-causes while rendering meaningful indicators on enterprise value creation relevant to customer drivers! All are captured in the tool--no more unnecessary conference calls.

PMOIQ™, release 3.0, is a rich Internet Application (RIA) that enables informative views all the way to the CIO—no need for the usual extensive reporting and printing. This tool enables vertical and cross-organization collaboration.

Release 3.x encapsulates best practices from Project Management Institute (PMI)®, and Capability and Maturity Model integration (CMMi)® among others; your investment in PMOIQ™ is founded on leading business processes.

technological merits at-a-glance

- ❖ JIT intelligence driven by Key Performance Indicators
- ❖ Flexible and configurable slice and dice capabilities
- ❖ Balanced Performance Scorecard (PSC)—configurable by role
- ❖ Operational dashboard with drill down capabilities
- ❖ Pre-built Metrics: Flexible and configurable Key Performance Indicators (KPIs)
- ❖ Collaboration and Event Management: Robust collaboration engine with easy to configure rule-based notifications across hierarchies
- ❖ Data Integration: **DynamicsIQ™** is multi-dimensionally-aware application with customizable meta data covering a wide range of enterprise applications. It may be deployed as an in-house deployment or as Web Services
- ❖ Flexible thin-architecture that easily integrates with other platforms/tools:

Applied Enterprise Dynamics, Inc. (AED) is founded by senior industry leaders with an average tenure of 15 years in management and IT. AED is committed to advanced value creation to business and IT. Ask about our **ROI guarantee!**
